The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-21 are rejected under 35 U.S.C. 102(a) as being anticipated by Matsumoto et al.

Matsumoto et al teaches in figure 1 forming lump patterns 4 in scribe lines 2. Square lump pattern shape is shown. The metal layer plug configuration is shown in figure 12. Aspects of wafer processing are taught throughout with paragraph (0033) specifically teaching wafer processing relative to alignment marks.

Claims 1-21 are rejected.

Wanibe et al is cited to show scribe lines formed with patterns.
